

# **A SYSTEM AND METHOD FOR TRANSFERRING DATA FROM A SOURCE MACHINE TO A TARGET MACHINE**

## **ABSTRACT OF THE DISCLOSURE**

A system and method are disclosed for providing data transfer between a source  
5 machine and a target machine. In one embodiment of the present invention, a method  
and system for transferring data comprises performing a first operation wherein the first  
operation copies a first file from a first memory to a second memory, and a second file  
from the first memory to the second memory, wherein the first file is copied substantially  
concurrently with the copying of the second file, and wherein the first operation results in  
10 a first copied file and a second copied file in the second memory; and performing a  
second operation wherein the second operation updates the first copied file and the  
second copied file in a predetermined order.
